DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Zur Loye et al (6,561,157).

Zur Loye et al teach a method comprising the steps of operating an internal combustion engine in a first mode comprising one of a diesel mode and a pilot ignited gaseous fuel mode; then operating the internal combustion engine in a second mode comprising the other of said diesel mode and the pilot ignited gaseous fuel mode; and (C) during a transition period between the first and second modes, controlling engine operation based on at least one engine operating parameter other than total energy fuel content to achieve an at least substantially smooth transition between operating modes.
